// PROFESSIONAL PROFILE

Computer Science Engineer (UNAB, 2025), with **6 months of professional experience** at ITISB and participation in the design, development, and integration of **ELVIR**, a full-stack AI platform for Teletón youth, deployed as a real pilot.

Interest in junior roles in software development, data engineering and machine learning, data analysis and data science, with a path toward **Data Engineering** or **Machine Learning Engineering**. Strong interest in AI, health, education, and applied research projects.

// ABOUT ME

Enjoys **continuous learning** — tools, certifications, whatever the project needs. When something matters, goes into **deep focus**: researches thoroughly before speaking or coding. Uses **AI as a productivity tool**, with own judgment; does not trust it blindly.

Continuously **improving interpersonal skills** and performance **under pressure**. Almost always works with **music** on; driven by video games, sports, and technology with real-world impact.

What defines this path most: started without a strong foundation in math and physics, and with many doubts about graduating or coding independently. The degree, the ML thesis, and ELVIR at ITISB were built step by step — not from certainty, but from consistency.

// TECHNICAL SKILLS

// WORK EXPERIENCE

ITISB — Institute of Technology for Innovation in Health and Wellbeing · Viña del Mar

Junior Full Stack Developer

Mar 2026 – Jun 2026

Hybrid · Part-time · ELVIR project (AI avatar job interviews · Teletón)

- **End-to-end platform**: Angular (youth/tutor/admin), FastAPI, PostgreSQL, JWT, RBAC, tests, quality gate, Alembic, health checks; docs on GitHub (ER, API, architecture, deploy).
- **UX + AI integration**: flows, professional panel, waiting room, user manual; LiveAvatar/LiveKit (sessions, dynamic context, research prompts); technical report and Spanish voice integration (ElevenLabs).
- **Teletón production pilot**: install-free demo, mobile-responsive, support and incident handling (audio/permissions); Docker, Vercel, Supabase, Northflank deploy.

ACHIEVEMENT — Real pilot with Teletón (labor inclusion); ITISB supervisor highlighted front/back progress. github.com/Catussi/ELVIR-Demo · elvir-demo.vercel.app

Computer Science Engineering Intern

Jan 2026 – Feb 2026

Hybrid · Same ELVIR project

- Started from the initial brief: **mockups, flows, data model** and front/back proposal; chose **FastAPI**, defined REST contracts, and separated session vs. simulation in the model.
- Implemented API with LiveAvatar, validated **end-to-end** flow (prototype + integration), and delivered a GitHub repo with docs and demo scripts — baseline validated by ITISB.

ACHIEVEMENT — From intern to full stack developer on the same team and project.

Universidad Adolfo Ibáñez (UAI) · Viña del Mar

Digital Assistant

May 2024 – Sep 2024

Remote · Trusted AI 2024

- WordPress, hosting, SSL (DreamHost), and promotional content for the workshop.

ACHIEVEMENT — Platform live for 5 months; 20+ published assets.

MIA Chile — Women in AI · Viña del Mar

University internship

Apr 2022 – Aug 2022

Hybrid

- Institutional website redesign, Power BI dashboards, and hosting administration.

ACHIEVEMENT — Greater visibility and tracking reports for the association.

// FEATURED PROJECTS

PROJECT_01

ELVIR — AI Virtual Job Coach

ITISB / Teletón · production pilot

Front, back, DB, avatar, deploy, and docs (ER, API, flows). External conversational AI; platform integration and orchestration by the author.

github.com/Catussi/ELVIR-Demo · elvir-demo.vercel.app

PROJECT_02

Bachelor's thesis — Machine Learning on academic trajectories

Python · scikit-learn · SHAP · XAI · UNAB · Grade 6.6/7.0

ML pipeline on longitudinal school records. Supervised models and interpretability for bias analysis. Advisor: Mailyn Calderón-Díaz.

PROJECT_03

OpsPulse — data-driven portfolio

FastAPI · Celery · PostgreSQL · Angular · dbt · Airflow · MLflow

Portfolio with ingestion, ETL, orchestration, dashboards, and observability; end-to-end retail data-driven flow.

// EDUCATION

Computer Science Engineer · 2020 – 2025

Universidad Andrés Bello (UNAB), Viña del Mar

Professional degree — December 2025

// COURSES & CERTIFICATIONS

IBM Data Science (Professional Certificate) — IBM / Coursera · 2025

In progress: AWS certifications
